

A robust and elegant daysailer with exquisite sailing characteristics and stability, that's how you describe the DAY.M8. Classic lines above water level, combined with a new-fashioned hull form. Easy to manage single-handed or in the company of your partner and friends. The method of construction together with the choice of material for fittings, rigging and accessories, ensure a high level of quality with little maintenance. These qualities make the DAY.M8 the perfect daysailer. They make sure that you're able to do what you came for; sailing on beautiful inland waters, close by and further away.
