

Dutch prosperity

This ship is actually identical to the 1400, but executed in mirror version. This means a very spacious aft deck and then a bathing platform. Both types are built in double-chine truss, using 5 mm for the undercut and 4 mm for the superstructure. Furthermore, completely finished as all Almyachts. Above the waterline insulated with stone wool and in the engine room with sound insulation. Woodwork of your choice in teak, mahogany or cherry. Both the exterior doors and the steps are made of solid teak. Beautifully finished interior with rounded corners, decorative frames and curtains. Technical and electrical installation are carried out with craftsmanship, as well as the helm, kitchen and sanitary equipment. The ship is finished off to the last detail: blasted and equipped with 2-component paintwork. Upholstery and layout is, as with all Alm vessels, completely free to choose according to your own wishes.
