

Almkotter 13.30 AK

With its straight rear, this hekkotter / mirror cutter creates even more space in the aft cabin and on the aft deck. Naturally double chute. 5 mm plate is used for the sub-chip and 4 mm for the superstructure. The entire ship is delivered perfectly finished: insulation, paneling (in teak, mahogany or ash). Interior trim with rounded corners, decorative laths and curtain coves. The technical installation is also perfectly executed, as is the electrical installation and kitchen equipment. Painting in 2-component colour and upholstery of your choice. And we prefer not to talk too much about the layout, not yet, because you will decide for yourself.
