

Privateer Pilot 49

Proven in practice

Sleek and sturdy in equal measure, the moment you board a Privateer Pilot you can feel the exceptionally high standards of construction and the immense care and attention to detail. The design clearly has its origins in the traditional Pilot boats, but the icing on the cake for the Privateer Pilot is that the yacht is based on the tried and trusted engineering of the Privateer Kotter. It makes for a potent blend of benefits.

See far

One of the major attractions of the Privateer Pilot is the fabulous helm and seating position for you and your fellow boaters. Here you will capture the very essence of sailing, with superb visibility and complete control. The helm station also has a smart chart table and excellent access to the other areas of the yacht.

Deluxe finish

Available in the versions 40, 43, 46, 49 ft - several different arrangements can be applied to this model, always excellently laid out based on our experience and your preferences. A deluxe finish is assured as the advanced thinking of the Privateer craftsmen is deployed on your behalf. First class equipment and smart logistics mean you make the most of every square centimeter.
