

Sturier Dutchman 52

The Dutchman 52 combines aspects of the culture of Dutch yacht building with iconic elements of the current Sturiër yachts. The result is an elegant and confident yacht that stands out for its powerful appearance. The yacht is characterized by an impressive bow, a quick and efficient round bilge hull and a shapely aft. The modern interior is packed with refined workmanship and innovative technology.

Design

The Dutchman 52 was developed in collaboration by the shipyard and design agency Langenberg. The 10 years of experience with the Sturiër CS (centre sleeper concept) is used for the development of the new DM (Dutchman).

A powerful brand identity

The new Dutchman is clear evidence that Sturiër Yachts does not blend into the crowd. This new line will further strengthen the Sturiër identity.

Build by the best

The DM 52 is semi-custom built and its standard version is luxurious and fully equipped. The yacht is built at our own yard and produced under own management from the keel to the mast. Our quality, experience and expertise of nearly 100 years are used in building your ship.

Through its CE cat. A certification, long range capability, and a maximum height under 3.50 m. you can enjoy a wide sailing area, from Scandinavia to the Mediterranean.

Versions

The DM 52 is available in the 2 or 3 cabin versions. The 2 cabin version has a dinette and galley downstairs and provides an outside view through the panoramic windows in the hull. The yacht can be used throughout the year because of the underfloor heating, the good thermal insulation and double glazing in the wheelhouse. You can also enjoy the winter on the water. The ship is equipped with 2 engines of 170 hp which are placed in an enclosed steel engine room which is well insulated to minimize engine noise. It is also equipped with a hydraulic system for thruster, stern thruster, stabilizers, mast and steering. The system is designed in such a way that one engine can also be used alone.

Specification

Lengte	15-18
Materiaal	Steel
Materiaal	Steel
