

Van den Hoven Executive 1700

The Van den Hoven Executive 1700 is for people requiring even more space than the Executive 1500. The larger dimensions also further enhance sailing comfort, speed and engine efficiency.

At the same time, the 1700 is a typical Van den Hoven in terms of its distinctive design, high build quality and superior finish. The low vertical clearance of 3.45 metres and CE certification A make the potential sailing area almost unlimited: summers in the Netherlands, Belgium and France turn into autumns and winters in the Mediterranean, and back again along the Spanish and French coasts.

LOTS OF INTERIOR SPACE

Thanks to the large social area and spacious wheelhouse, skipper and guests alike enjoy magnificent views, making every trip a true sailing experience. The open feel of the interior is further enhanced by the specious galley situated just two steps below in the split level arrangement and featuring all the comforts of home.

The expansive aft deck, with its large comfortable five-person settee and fixed table, forms a level seven-metre-long space with the adjoining open social area and wheelhouse. The large folding doors allow the indoors and outdoors to blend together beautifully, generating a fabulous al fresco feel. Further forward is a separate day head, roomy guest cabin with lots of storage and a bathroom with shower.

From the galley/dinette, a staircase leads down to the aft cabin. This large owners' suite contains a spacious freestanding bed, lots of storage (hanging and shelves) and drawers, and a spacious bathroom with heated mirrors. Doors on each side of the corridor lead to two separate engine rooms, part of which features standing headroom. The choice of layout and materials is always determined together with the client. The Van den Hoven Executive 1700 is a semi custom built yacht that will involve you in every detail of its construction.

Specification

Lengte	15-18
Materiaal	Steel
Lengte scheepsromp	17,3m
Inhoud watertank	1.500l
Waterverplaatsing	42ton
Gewicht	42.000kg
