

Piet Hein Sloop

More than complete

The Piet Hein sloop is based on the Scandinavian fishermen's sloops that sailed for centuries from fjord to fjord. Martin de Jager's design proves its worth on open water where the sloop stays high and dry. Sound, sturdy and designed with care: qualities you can expect from a Piet Hein sloop. The first Piet Hein sloop was built in 1996 and more than 400 boats followed. The Piet Hein sloop is one of the leading brands on the Dutch market. Time after time the trade-in value proves the value for money ratio of new boats.

General information, standard equipment:
