

Van den Hoven Executive 2100

Like the other models, the 2100's elegant exterior is designed by Arnold de Ruyter, while the interior is the work of Bart van den Hoven. The dynamic and elegant lines create a timeless appearance, which will turn heads many years from now.

Because this Van den Hoven is made out of steel, it is possible to bring the owners wishes to life. Especially the layout can be perfectly tailored to your taste. The first 2100 ordered does not have a flybridge – the owner wished to have an lower vertical clearance to expand his sailing range within Europe – the 2100 can be built with a flybridge at your request.

The Executive 2100 is expected to mainly sail in Europe. The mast can be folded down and the vertical clearance is relatively low at 3.85 meters, it can pass under most bridges. The yacht has an stylish appearance thanks to the extensive use of stainless steel. Sailing comfort is guaranteed by stabilisers in the form of hydraulic fins and two diesel engines of 330 hp each.

Specification

Lengte	20-25
Materiaal	Steel
