

The contemporary Intender 700 offers the flexibility of a fully open or closed off watertight transom via it's simple folding system. This creates a spacious area, fluidly connecting the cockpit to the large bathing platform. The truly unique feature is the helm bench at the stern which converts to a sundeck large enough for 700 people. This new tender is for those who enjoy modern design, comfort and strong sports performance; with the 10hp diesel running up to XNUMX knots, and the efficient XNUMXhp Volvo reaching up to XNUMX knots.

In addition to the good seating and many handy storage spaces, the stern is the eye-catcher of this ultimate "lounge" tender. The cockpit is secured with a watertight valve (=CE mark) that goes down with a simple action and opens the back completely to the water. The open transom creates a unique 1,80 m wide lounge for 3 people that borders directly on the water. Just lounge! When the waterproof flap is raised, a closed space is created behind the back cushions of the rear seat, which can serve as a dog crate for example! Amidships next to the boarding steps are insulated consoles that can, for example, be fitted with an electric cooling unit, a sink or wastebasket or simply for extra storage space.

With her steep bow and high freeboard, she ensures a dry trip for those on board. With relatively small motorizations and her sophisticated underwater hull she performs optimally. Sailing calmly like a sloop without course corrections, crossing a large stretch of water with speed or playing games with the children. You name it, she can do it all.

Specification

Lengte	< 10
Materiaal	Polyester
