

# Hutting 46

From miles away you recognize the renowned Hutting line from the water. Robust and solid, yet elegant with clearly defined classic lines. The Hutting 46 Explorer; the ideal long-distance cruiser exclusively built to your style.

Excited? Schedule a visit to the yard or join our exclusive introduction event incl. a lecture of the Naval architects the 13th of April 2024. Register

## DESIGNED FOR ULTIMATE PERFORMANCE

The Hutting 46 Explorer is designed by [Van Oossanen naval architects](#), specialists in hydrodynamics and the design of sailing yachts with specific performance requirements. Leveraging their expertise, they have created various sailing yachts for prestigious competitions such as the America's Cup.

The design comes with two types of bulb keel types: one short variant with winglets resulting in a total draft of 1.9 meters and a longer version without winglets resulting in a total draft of 2.4 meters; both variants achieve nearly identical performance.

The bulb dimensions are meticulously calculated using CFD; 'computational fluid dynamics technology. Additionally, the extendable bowsprit provides the flexibility to deploy a Code zero or Helix, to increase optimal tuning capabilities in any weather condition ensuring safety, control, speed and optimal sailing performance.

## Specification

**Materiaal**

Aluminium
